Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3, 5-14 and 16-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over LaBounty et al. (6,061,911) in view of Ramun (6,202,308).

LaBounty et al. discloses (Fig. 1-10) the invention substantially as claimed including:

- Claims 1, 3, 6, 8-9 and 12-14; a lower jaw 12, an upper jaw 14, pivot means 16, means for attachment to the boom structure of the excavator 18, a first mounting plate (26 and 80), a second mounting plate 28, guides (68 and 95) and means for attaching the guide/bolts 72.
- Claims 5, 11 and 16; pockets (see Fig. 7).
- Claims 7 and 17; the first blade stabilizer is mounted rearwardly of the pivot means and the second stabilizer is mounted forwardly of the pivot means (see Fig. 3-4).

LaBounty et al. does not show a shim. However, Ramun teaches the use of a shim 70 for the purpose of adjusting the distance between the blades because of the decrease in width caused by

wear. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the device of LaBounty et al. by providing the shim as taught by Ramun in order to obtain device that adjusts the distance between the guide and the upper jaw.

Allowable Subject Matter

3. Claims 4 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Morikawa et al. is cited to show related device.
